

NIKOLA TESLA - BETWEEN TECHNOLOGY, SCIENCE AND PSEUDOSCIENCE

Prof. Dr. Dragoljub Pokrajac

Delaware State University (DSU), Dover, Delaware, USA
e-mail: dpokrajac@desu.edu

Nikola Tesla, the most famous and prolific inventor from the Balkans, continuously attracts attention of numerous persons: from engineers to scientists, from laypersons to experts, from hobbyists to cultists. Frequently, Tesla has been attributed with various claims, hypotheses and statements that contradict contemporary physics and electrical engineering practice. This presentation is a modest attempt to delineate pseudoscience from true contributions of Nikola Tesla to the field of engineering.
